INFORMATION TECHNOLOGY (IT) SYSTEMS PERSONNEL SECURITY PROGRAM REQUIREMENTS

The U.S. Government conducts trustworthiness investigations of personnel who are assigned to positions that directly or indirectly affect the operation of unclassified IT resources and systems that process Department of Defense (DoD) information, to include For Official Use Only (FOUO) and other controlled unclassified information.

The United States Office of Personnel Management (OPM), Federal Investigations Processing Center (FIPC) process all requests for U.S. Government trustworthiness investigations. Requirements for these investigations are outlined in paragraph C3.6.15 and Appendix 10 of DoD 5200.2-R, available at <http://www.dtic.mil/whs/directives/corres/dir.html>. Personnel occupying an IT Position shall be designated as filling one of the IT Position Categories listed below. The contractor shall include all of these requirements in any subcontracts involving IT support. (Note: Terminology used in DoD 5200.2R references "ADP" vice "IT". For purposes of this requirement, the terms ADP and IT are synonymous.)

The Program Manager (PM), Contracting Officer's Representative (COR) or Technical Representative (TR) shall determine if they or the contractor shall assign the IT Position category to contractor personnel and inform the contractor of their determination. If it is decided the contractor shall make the assignment, the PM, COR, or TR must concur with the designation.

DoDD Directive 8500.1, Subject: Information Assurance (IA), paragraph 4.8 states "Access to all DoD information systems shall be based on a demonstrated need-to-know, and granted in accordance with applicable laws and DoD 5200.2R for background investigations, special access and IT position designations and requirements. An appropriate security clearance and non-disclosure agreement are also required for access to classified information in accordance with DoD 5200.1-R (reference (o))." DoD 5200.2R and DoDD 5200.2 require all persons assigned to sensitive positions or assigned to sensitive duties be U.S. citizens. All persons assigned to IT-I and IT-II positions, as well as all persons with access to controlled unclassified information (without regard to degree of IT access) or performing other duties that are considered "sensitive" as defined in DoDD 5200.2 and DoD 5200.2R must be U.S. citizens. Furthermore, access by non-U.S. citizens to unclassified export controlled data will only be granted to persons pursuant to the export control laws of the U.S. The categories of controlled unclassified information are contained in Appendix 3 of DoD 5200.1R. These same restrictions apply to "Representatives of a Foreign Interest" as defined by DoD 5220.22-M (National Industrial Security Program Operating Manual, NISPOM).

Criteria For Designating Positions:

IT-I Position (Privileged)

- Responsibility or the development and administration of Government computer security programs, and including direction and control of risk analysis and/or threat assessment.
- Significant involvement in life-critical or mission-critical systems.
- Responsibility for the preparation or approval of data for input into a system, which does not necessarily involve personal access to the system, but with relatively high risk for effecting grave damage or realizing significant personal gain.
- Relatively high risk assignments associated with or directly involving the accounting, disbursement, or authorization for disbursement from systems of (1) dollar amounts of \$10 million per year or greater, or (2) lesser amounts if the activities of the individual are not subject to technical review by higher authority in the IT-I category to ensure the integrity of the system.
- Positions involving major responsibility for the direction, planning, design, testing, maintenance, operation, monitoring, and/or management of systems hardware and software.
- Other positions as designated by Space and Naval Warfare Systems Command that involve relatively high risk for effecting grave damage or realizing significant personal gain.

Personnel whose duties meet the criteria for IT-I Position designation require a favorably adjudicated Single Scope Background Investigation (SSBI) or SSBI Periodic Reinvestigation (SSBI-PR). The SSBI or SSBI-PR shall be updated every 5 years by using the Electronic Questionnaire for Investigation Processing (eQIP) web based program (SF86 format).

IT-II Position (Limited Privileged)

Responsibility for systems design, operation, testing, maintenance, and/or monitoring that is carried out under technical review of higher authority in the IT-I category, includes but is not limited to:

- Access to and/or processing of proprietary data, information requiring protection under the Privacy Act of 1974, and Government-developed privileged information involving the award of contracts;
- Accounting, disbursement, or authorization for disbursement from systems of dollar amounts less than \$10 million per year. Other positions are designated by Space and naval Warfare Systems Command that involve a degree of access to a system that creates a significant potential for damage or personal gain less than that in IT-I positions. Personnel whose duties meet the criteria for an IT-II Position require a favorably adjudicated National Agency Check with Local Agency Check and Credit Check (NACLIC) which is submitted using the eQIP web based program (SF86 format).

IT-III Position (Non-Privileged)

- All other positions involving Federal IT activities. Incumbent in this position has non-privileged access to one or more DoD information systems, application, or database to which they are authorized access. Personnel whose duties meet the criteria for an IT-III Position designation require a favorably adjudicated NACLIC which is submitted using the eQIP web based program (SF86 format).

Qualified Cleared Personnel Do NOT Require Trustworthiness Investigations:

When background investigations supporting clearance eligibility have been submitted and/or adjudicated to support assignment to sensitive national security positions, a separate investigation to support IT access will normally not be required. If an individual is cleared, but does not have a completed SSBI and is determined to be an IT-I, then a SSBI will be submitted using the eQIP web based program (SF86 format). A determination that an individual is NOT eligible for assignment to a position of trust will also result in the removal of eligibility for security clearance. Likewise, a determination that an individual is NOT eligible for a security clearance will result in the denial of eligibility for a position of trust.

The Facility Security Officer (FSO) must verify employee's security clearance eligibility in the Joint Personnel Adjudication System (JPAS) before instructing the individual to complete and submit the appropriate investigation.

Visit Authorization Letters (VALs) for Qualified Employees:

Contractors that have been awarded a classified contract must submit visit requests using "only" the Joint Personnel Adjudication System (JPAS). All government activities have been directed to use JPAS when transmitting or receiving VALS. Therefore, contractors who work on classified contracts are required to have established an account through JPAS for their facility. This database contains all U.S. citizens who have received a clearance of Confidential, Secret, and/or Top Secret. The visit request can be submitted for one year. When submitting visit requests to Space and Naval Warfare Systems Center Pacific use its Security Management Office (SMO) number (660015). This information is provided in accordance with guidance provided to contractors via the Defense Security Service (DSS) website https://www.dss.mil/portal/showbinary/bea%20repository/new_dss_internet/about_dss/press_room/jpas_procedures_final.pdf (DSS guidance dated 24 April 2007, subject: **Procedures Governing The Use Of JPAS By Cleared Contractors**).

The contractor shall:

- Immediately notify the COR or TR of the employee's termination.
