

NGC2P TR N00039-12-R-0110 Question and Answer Set #1

Q1. Will the new contract replace the processor: AYK/UYK, Motorola 68030/68040, Power PC processor, and are the requirements asking for any maintenance of the older I/O handling and/or the older instruction sets?

A1. Processors are being replaced. No CMS-2Y software coding is required in the performance of this contract. Please refer to the PWS and technical information on the NESI site which describes the specific requirements and background for this effort.

Q2. Will the Government be posting the NGC2P Integrated Master Schedule?

A2. No, the vendor will be providing the IMS as described in the RFP. The only available schedule information was contained in the industry day presentation located on the NESI site.

Q3. Is there a target date for Critical Design Review (CDR) for Task Order 1 and Preliminary Design Review (PDR) for Task Order 2? If no target dates, are there "No later Than" dates for these milestones?

A3. See A2. The vendor will need to propose appropriate effort and schedule to accomplish the technical approach they are proposing.
